

# THE BLAIRMORE ENTERPRISE

VOL. XXXIV, NO. 7.

THE BLAIRMORE ENTERPRISE, FRIDAY, FEBRUARY 19, 1943.

\$2.00 PER ANNUM.

"Serve the Church that the Church  
May Serve You."

## CENTRAL UNITED CHURCH BLAIRMORE

Rev. E. R. Arrol, B.A., Minister

Services Sunday next:  
11.00 a.m., Senior school.  
2.00 p.m., Junior school.  
7.30 p.m., Public Worship.  
Wednesday, 8 p.m., Prayer service.

## ST. LUKE'S CHURCH, BLAIRMORE

Rev. J. R. Hague, A.B., Incumbent

Services Sunday next—  
11 a.m., Matins and sermon.  
12 Noon, Sunday School.

## SALVATION ARMY, COLEMAN

Lieut. R. D. Marks, Officer in Charge

Sunday services:  
10.30 a.m., Y.P. Directory Class.  
11.00 a.m., Holiness Meeting.  
3.00 p.m., Sunday School.  
7.30 p.m., Salvation Meeting.  
Tuesday: 7.30 p.m., Red Shield Auxiliary and Home League.  
Thursday: 8 p.m., Praise Meeting.  
Funerals and dedications on application to the local officer.

## AIR CADETS OF CANADA

Weekly Routine Orders (R.O.30)

Issued by ACFO S. White, C.O.  
Turtle Mountain Squadron No. 157,  
Blairmore, Alberta.  
Parade: Wed., Feb. 24, 1943—  
First Aid 1600 to 1700 hrs.  
Parade: Thurs., Feb. 25, 1943—  
Fall In 1855 hrs.  
Drill 1900 to 1930  
Signals 1930 to 2000  
Aircraft Recognition 2000 to 2030  
Navigation (H. Sch.) 2030 to 2115  
D. MacPherson, Adjutant.

Through the generosity of William Cole, of Cole's theatres, in donating the use of his Pass show houses and equipment for the showing of the Russian war picture "Russia Strikes Back," the Aid to Russia fund has been boosted to over \$5,000 in the Pass towns of Coleman, Blairmore, Bellevue and Hillcrest. A cheque has been forwarded to headquarters in Toronto, signed by Mayor E. Williams, of Blairmore.

Gasoline for farm trucks will be rationed, but a farmer who does not own a truck will be given extra allowance for his passenger car, according to his proved individual needs, the Munitions and Supply Department has announced. Under a new rationing system becoming effective April 1st, every non-commercial vehicle will be granted a basic Category "AA" ration book containing forty coupons, permitting each vehicle, on the basis of 18 miles to the gallon and at present unit value, a basic 2,160 miles of driving between April 1, 1943, and March 31, 1944.

Alberta will pay a bounty on timber wolves and cougars following passage of a new order-in-council this week. Bounties are \$10 for wolves and pups, \$15 for cougars. No animals taken in national parks and in certain designated areas. Only residents of Alberta may obtain the bounties. Application should be made to the nearest R. C. M. P. officer or salaried game warden and the pet should include the application. Both ears must be attached. The new order will bring gratification to many trappers, farmers and sportsmen who have been urging bounty payments as a means to cut down the hordes of predators of big game animals.

## AIR CADETS—TURTLE MOUNTAIN SQUADRON

Blairmore has its Legion, its Red Cross, its I.O.G.E., and now its Air Cadets. Perhaps some of you have sons or brothers in the Turtle Mountain Squadron and all have seen the boys which fill its ranks, but how many know the story of the unit?

A few months ago, Mr. S. G. Bannan, a local school trustee, met, while in the course of his duties, the Air Cadet Officer for Alberta. Mr. Bannan became very much interested in the movement and returned determined to see Blairmore with a Cadet Corps. Unfortunately the minimum personnel requirement was fifty cadets, a number which would be almost impossible to raise in Blairmore. Then word came from Ottawa that the number had been reduced to twenty-five. Plans went ahead with great speed. A representative committee was formed by Mr. Chappell, and applications were sent in to headquarters for uniforms and equipment. Principal D. MacPherson and Mr. S. White, of the local teaching staff, went to Calgary and took Cadet Officers' training at the R.C.A.F. depot. Dr. Blair was appointed the Flight's Medical Officer, and Mr. R. Thompson its Equipment officer. A few days after school opened for the new term, the first routine orders were posted and classes began. Soon equipment began to trickle in: four rifles, forty-five uniforms, text books, twelve more rifles. Teaching became easier. New classes were incorporated until at present the Cadet week is made up of drill, signals, aircraft recognition, navigation, administration, aerobics, meteorology, first aid, and band practice.

Drill is a primary part of the course. It is taught by Sergeant Mulman, whose many years of experience in the R.C.M.P. makes him a well qualified instructor. In the summer the boys drill in the school yard, but during the winter months the Columbus hall is used for that purpose. As soon as the weather permits, rifle drill will be started. Improvement has come fast, and at present the Turtle Mountain Squadron compares favorably with other units in the district.

Mr. Millett, our very genial Signals instructor, teaches Cadets how to operate buzzers, using international code. There are nine of these sets, an amplifier, and a sender, which uses light instead of sound in transmitting code. Some of the Cadets have become quite efficient, while others find the course more difficult.

Aircraft Recognition is a very important class. Mr. E. Scraba has taken over the teaching of that subject. Cadets are required to be able to identify any important aircraft. They must know the wing spans, lengths, and any peculiar characteristics as well as armament and duties of the planes. This task is made easier by means of a projector and slides, which have recently been placed in the store room. Fortunately, no Messerschmitts or Zeros have been identified in this area, although many of the lads claim to have seen Portresses and Tiger Moths.

Navigation consists chiefly of map work. Unfortunately not all the Cadets have the mathematical basis necessary, and therefore only those in High School are permitted to take that subject. The map reading and computing are done directly on maps provided for that purpose. ACFO White teaches the Navigation course.

ACFO D. MacPherson is the Administration and Meteorology instructor. Administration deals principally with discipline, saluting, formal procedure, and barracks life. A knowledge of it is essential and it will be particularly useful when the Cadets go for two weeks stay at some R.C.A.F. depot in the summer holidays. Meteorology is a detailed study of the weather. In the far-flung battle areas, weather is the dictator of strategy.

NATIONAL  
SELECTIVE  
SERVICE

### Complete Utilization of Canada's Manpower and Womanpower is Essential to Victory

National Selective Service Civilian Regulations aim at complete utilization of manpower and womanpower. Workers and employers are urged to make the war effort by carrying them out. All civilian regulations have been consolidated and revised, main features now being as follows:

**COVERAGE**  
Employees: Regulations cover persons of either sex from 16 to 64 years old, except—provincial employees; armed services; and those in fishing, fish processing, hunting, trapping, clerical, nursing, school teachers, domestic servants; students working after school; employees in respect of part-time employment; and any one employed for 3 days or less in a calendar week. Agricultural workers are covered by special provisions, not by the general provisions as also are "technical personnel."

**EMPLOYERS** Any person, firm or other employers, with one or more "covered" employees.

**EMPLOYERS MUST—**  
(a) Refrain from dismissing employment with a prospective employee unless under permit.  
(b) notify the nearest employment office of additional employees needed; (c) secure permission from an employment office to advertise for workers; (d) notify the employment office of intention to discharge or lay off employees; or retain employees when not required; (e) give employees 7 days' notice unless a Selective Service Officer permits a reduction, or unless in building construction industry; (7 days' notice is not required unless an employee has already been employed for one month, or after fire, explosion or other calamity, or on termination of work by weather. Whether preceded by 7 days' notice or not, separation from employment requires written notice).

**EMPLOYEES MUST—**  
(a) Register for work at the nearest employment office if out of work 7 days (full-time students, housewives and clerks are not included); (b) secure permit from a Selective Service Officer if going to look for work; (c) refrain from advertising for a job unless Selective Service Officer approves; (d) give 7 days' notice if wishing to quit a job, unless authorized by Selective Service Officer to give less notice.

The foregoing is not an exact or complete reproduction of National Selective Service Civilian Regulations. For information on rules apply to various Regulations and Selective Service Offices.

## DEPARTMENT OF LABOUR

HUMPHREY MITCHELL  
Minister of Labour

OTTAWA, JANUARY 18, 1943

A. MCNAMARA  
Director of National Selective Service

## EMPLOYERS' IMMEDIATE ATTENTION NECESSARY

Tanks cannot be used effectively in swampy waters, nor planes in fog and storm; therefore a knowledge of the weather is vitally important. The R.C.A.F. gives the boys every opportunity to learn to be the fliers of the future. They send propellers, wings and other parts of dismantled aircraft. This proves very helpful in the study of aeroplanes and frames, which is taught by Manual Training teacher, Mr. Howarth.

Likewise the St. John Ambulance First Aid Society has proved very cooperative, supplying texts, bandages and splints. Classes are held every Wednesday, with Mr. Chamberlin, an excellent instructor, in charge. The generosity of the people of Blairmore has made the new Cadet band possible. The bugles issued Mr. Lote added: "Mr. A. McNamara, director of national selective service, points out that each and every employer (except farmers and householders employing domestic help) must make the return, regardless of the number of their employees. The director also states that some early returns received omit office and executive employees in the entries: all employees should be included. Also, some reports fail to forecast probable working staffs at April 30. These figures, too, must be given."

Please follow instructions contained in your letter which was sent you from Ottawa. At present there are forty delinquent employers in the Blairmore area.

— "V" —

Brigadier L. Ursaki, head of the Salvation Army in Alberta, visited Coleman and Blairmore on Friday and Saturday last.

— "V" —

Ptes. James Gray, Norman Bonneau and Norman Oliver were visitors to their homes here over the week end before leaving for important posts east.

## COWLEY HAPPENINGS

We are all rejoicing here over the mild spell of weather, and the infectious garden fever is beginning toicken our pulses again.

After spending several months in the Twin Butte district, Orin Burkhardt returned home this week to spend a few days with his parents.

Mrs. X. C. Kaupp and Mrs. W. Fortier are Calgary visitors for a few days.

Wilfrid Fortier left by Thursday's train for a visit to Montreal and other Eastern Canadian points.

Jock Labrie, of the R.C.A.F., stationed at Claresholm, spent a few days with boy friends here the early part of the week.

William Cochrane, of North Fork, was a week-end visitor to Calgary.

Ronald McNeil, of the Cowley airport, was visiting in Lehighbridge during the week.

Mrs. Cecil Elton and Michael Elton were week-end visitors to Calgary.

On account of bad country roads, all that we have seen tied up to the hitching post for the past several weeks has been saddle horses, sleighs of various makes and sizes, Bennett buggies, ordinary plain buggies, hay racks, farm wagons, etc. With a continuation of our fine weather, motor cars should be seen on the rural routes in a few days.

There is such a disease as trench mouth—and we have seen mouths that at times resembled trenches.

John Oegema, R.C.A.F., has been transferred from Toronto and now is member of No. 7 J.T.S. band at Saskatoon.

William Cole, junior, who last week end underwent an operation for appendicitis in the Bellevue hospital, is reported doing nicely.

## THE NEW RATION BOOK

In connection with the new ration books to be issued within the next week, you are asked to remember the following facts when making application for the new books:

Check to see that name, address, serial number, and age (if under 16), is stated on postal card of ration book 1. Although the applicant need not personally present his own book, he must fill out and sign the postcard at the book. This card should not be detached and mailed to the ration office. This will cause indefinite delay in receiving book 2, and owner would therefore be deprived of rationed commodities.

Present Ration Book 1 at the local distribution centre located in Punnagalli's garage, between the hours of 10 a.m. and 6 p.m., February 22nd to 24th, inclusive. Information from this book will be transcribed to the new book, and then both books will be given to the owner.

In remote districts, one neighbor may present the books of his friends in the community. Each book must contain completed information. The neighbor receiving them will be responsible for delivering them to the proper persons.

Families are advised not to entrust collection of new ration books for the household to children. Ration books are too valuable to be entrusted to children.

Persons who are going to be out of town when the new ration books are issued, may obtain a new book from the distributing centre nearest wherever they happen to be. But in obtaining a new book, the old book must be presented. If the move is temporary, persons over 16 in the household may obtain a ration book for the absent member of the family. Similarly, persons living away from home should arrange immediately to have their ration books sent to them.

Children who become 12 years of age before March 1 will be entitled to ration sheets for tea and coffee. These will be issued in their favor on application.

## HILLCREST HAPPENINGS

Re donation to Aid to Russia Fund: The Hillcrest Hungarian branch of the I.M.B.F. wish to announce that their subscriptions to date total \$903.

Miss Nancy Simion, of the R.C.A.F., came back to renew her acquaintances in Hillcrest and district after about six months absence in the east.

Ricardo D'Amico, of the R.C.A.F., has returned to Hillcrest after spending enjoyable holidays at the coast. He will soon be well again and be able to return to his training station to complete his flying course.

## STICK TO YOUR WAR SAVINGS CERTIFICATES

No better interest rates are paid on any Canadian war financing securities than on War Savings Certificates, if you hold them until full maturity.

They are meant to be held, not cashed. Canada promised that it would cash the certificates under certain circumstances, but this was done to avoid hardship in special cases, not because cashing a Certificate before maturity was anything but bad for the owner and bad for Canada.

That promise will be kept, of course, as Dominion of Canada financial obligations have always been kept—to the letter. But, too many thoughtless owners of War Savings Certificates are asking Canada to give them back their cash now, without any good reason, except that they want to spend the money, and at a time when the money is badly wanted to fight the Battle of Freedom.

Every person who buys a Certificate does a patriotic action, and at the same time gets himself a good investment and a cushion against post-war hard times.

WORLD HAPPENINGS  
BRIEFLY TOLD

George Welsh, 95, last survivor of the Stanley expedition to Africa which found the long-missing explorer Dr. David Livingstone, is dead.

The Soviet government has ordered food and building materials sent to inhabitants of districts in the Tadzhikistan republic stricken by an earthquake.

Alberta raised a sugar beet crop estimated at 331,000 tons last year, compared with less than 296,000 tons in 1941, about half of the seed coming from Oregon.

Taxes provided 91 per cent. of Canada's total revenue in the fiscal year ending March 31, 1942, public accounts tabled in the commons by Finance Minister Haley showed.

A collection to establish a memorial in honor of the late Paddy Flinn, famous R.A.F. pilot who was lost several months ago in action, has been opened by the Mayor of Richmond.

Value on the market of Canada's fisheries production in 1941 was \$62,258,900, the highest of any year in the Dominion's history, says the annual report of the fisheries department for the year 1941-42.

The Maharajah of Bikaner, 62, immensely wealthy ruler of a large Indian state, who died recently, had full ruling powers for 44 years, though he actually succeeded to his title when a boy of seven.

## Back-Buttoned Dress

By ANNE ADAMS

A really young housecoat that's smart from every angle is Pattern 4317 by Anne Adams. In front there's a becoming square neckline, a curve to the inset waistband and heart-shaped pockets. And in back there's a full-length buttoning.

Pattern 4317 is available in misses' and women's sizes 14, 16, 18, 20, 32, 34, 36, 38, 40. Size 16 takes 3 1/2 yards 35-inch fabric and 2 1/2 yards ric-rac.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg, Man.

## MICKIE SAYS—

WHEN GUTENBERG DID HIS PRINTING, HE WAS TH' BEST AROUND— BUT NOW, WITH US IN TH' FIELD, GUESS WHO'S THE BIG SHOT IN PRINTING

## New Domesday Book

Record Of Farms In England Will Soon Be Completed

After nearly nine hundred years, the famous Domesday Book is being revised. It follows a complete survey of England since the time of William the Conqueror, when the first Domesday Book was published. The original book dealt with the farms of England, and the new book records such things as the condition of each major farm, its equipment, the crops it is growing, the live stock it carries. It reports on the state of the land, the efficiency of the men farming it, and the adequacy of such services as water supply and electricity.

The work has been done by official surveyors assisted by nearly 6,000 farmers. They have covered 37,000,000 acres, inspecting every field on 300,000 farms. Many of these farms in England have remained intact since the time of King William. His object was to find how much could be collected from the farmers in taxes. The present objective is to see how much food can be raised for the community. The old Domesday Book took 20 years to complete. The new one will be completed in exactly that number of months.

## Help For China

Chinese Security And Independence Is Needed To Win The War

Help for China, as Gen. Smuts has said, is "one of their most important objects." Without the establishment of Chinese security and independence the war will not be won. The magnificent resistance of the Chinese is a momentous factor in all the strategy of the Far East.

That co-operation and good will which finds its machinery in the representation of the Chinese Government on the Pacific Council requires that China should exercise beyond doubt the full equality of a nation whom, in the Prime Minister's phrase, we are proud to acclaim as "fellow architects of victory."

The United Nations are not fighting to give one privilege over another but for a free world. In the freedom after peace the co-operation of China will be needed by America, Russia, Britain and the whole of mankind.—London Daily Telegraph.

Among wreckage left in the wake of Marshal Erwin Rommel's army was a car, which had two luxuriously furnished compartments paneled in rosewood, equipped with crockery and cutlery.

Sugar Jim Henry, former star goalie with the New York Rangers is the master netminder for the Canadian Army's hockey "Commandos" who are going strong at Ottawa, this season.

## Won A Cup

But Is Now Turning It In For Scrap Metal

Maj. J. E. Snow, U.S.A., is turning in for bullet metal scrap, a sharpshooter's cup which he won in competition with a crack Japanese team 15 years ago.

The cup that was being competed for was in reality the "Emperor's Cup" of solid silver. But when a foreigner won it, the Japanese discovered this would involve such a "loss of face" for the emperor that they begged Snow to accept a more modest cup.

Snow accepted but has now decided to send it back in a form that will do most good.

Use of cosmetics was highly developed in Egypt as early as 1350 B.C.

By William Ferguson

## THIS CURIOUS WORLD

IT IS ESTIMATED THAT EVERY MEADOWLARK IS WORTH ONE DOLLAR A YEAR AS A DESTROYER OF GRASSHOPPERS ALONE

ANSWER: Right. Telescopes give us detailed views of the moon's surface, the heights of its mountains, and the diameters of its craters.

## SUNDAY SCHOOL LESSON

FEBRUARY 14

## JESUS HEALS A MAN BORN BLIND

Golden text: One thing I know, that, whereas I was blind, now I see. John 9:25.

Lesson: John 9. Devotional reading: Psalm 27:1-6.

Explanations and Comments

Jesus Gives Sight to a Blind Man, John 9:1-9. When Jesus met a man who had been blind from birth, he saw an opportunity to make manifest the works of God, and was reminded of the shortness of time yet remaining in which he could fulfill his mission on earth. "I must work the work of him that sent me, while it is day; the night cometh when no man can work," he said. "As long as I am in the world, I am the light of the world." It was his mission to dispense light.

Jesus spat on the ground and made clay of the spittle, then anointed the eyes of the blind man. Doubtless he did this in order to let the man feel his ministering touch, to awaken expectancy, to arouse the man's faith through the use of means popularly supposed to be efficacious, and to test his obedience. Then Jesus ordered him to go and wash in the pool of Siloam.

The Pharisees Question the Man and His Parents, John 9:13-34. Because the miracle was wrought on the Sabbath and broke the ritual law, some of the Pharisees said that Jesus was a sinner, but others said, "How could a sinner do such a miracle?" When they asked the man what he thought of Jesus he answered, "He is a prophet." Next they claimed to doubt that the man had been blind, and they summoned his parents. His parents feared the Pharisees, for the latter had threatened to excommunicate anyone who should acknowledge Jesus to be the Christ, so they said that they knew not where he was.

Again they called the young man before them and put him on oath. "The words 'Give glory to God' were the form of an oath proposed by the chief magistrate to those who were to give evidence to any particular fact; or to attest anything, as produced by, or belonging to, the Lord. See Joshua 7:19." "Confess what we know, that Jesus is a sinner," they adjured him. "Whether he sins against your creeds I know not; one thing I do know, that whereas I was blind, now I see," he stoutly maintained.

The land route from Dakar to the Mediterranean is nearly 3,000 miles in length.

## Farmers Were Clever

Russians Took Food Through Nazi Lines To Besieged Leningrad

The story of Pavlo Ivanovich, a Russian name for one of the patriotic farmers who helped feed Leningrad at one critical time in its 17 months of siege, was told by Russian war relief officials in New York.

Although the Nazis besieged the city, they did not control all the surrounding territory. There were "islands" of resistance off the main highways where Russians still tilted their farms within sound of the battlefield. Pavlo Ivanovich and his friends were clever. When their carts were loaded they padded their horses' hooves with burlap wrapping. They secured any harness which might jingle and they moved in convoys. Along familiar backroads they crept stealthily, guided by their guerrilla friends in force. There were women among the guerrillas as many as 50 sometimes, armed with tommyguns and skilled in the nearest and most quiet ways of swiftly dispatching any Nazi who chanced to raise his head as the convoys moved through the German lines. It was a perilous job, but the Russian war relief says about 400 tons of food were delivered in this way to the hungry inhabitants.

Nazi guns and bombs might damage the water supply system, but the Russians were strong even in hunger, and 2,000 young men and women were mobilized to draw water from holes in the ice of Lake Ladoga and the Neva river.

Winter was the hardest time. Not only was food lacking, but there was no fuel for domestic use. Fuel and power went to hospitals and factories.

Women and school children cut down trees for fuel. Through the two winters the schools were unheated although there were 80,000 children in attendance.

## His Own Troubles

Lord Halifax Does Not Show His Sorrow To World

Once, in the old days of the isolationist debate, Britain's devout Lord Halifax stopped to chat with an American mother picketing his hotel with an anti-war banner. He listened gravely to her story of her nine sons, said quietly, "I too, have sons," shook hands, walked on.

One of his three sons, Lieut. Francis Hugh Peter Wood, 26, was killed in Egypt last November. The U.S. would never have known, save for dispatches from London. Nor could anyone who met the British ambassador in recent weeks, or worked with him at the embassy, or watched him listen to the president's speech to congress, have guessed that Lord Halifax had learned that his youngest son, Lieut. Richard Frederick Wood, 22, had lost both legs when wounded by a Nazi bomb in Libya—Time.

### CHAPTER VI

STORY and Annette Fournier listened tensely to metallic clicks and raps as the guard struggled to insert the key, and then they heard his voice, plaintive and trembling: "The key will not go into the lock, O Sheli! The girl knows we are here and has jammed the keyhole full of twisted wire or something."

Immedin grunted. "That is impossible. Where, in those bare cells, would a prisoner obtain a length of wire or any other metal? Give me that key!"

Out of the lock came sounds like the gnawing of a rat. The key on Story's side of the door wobbled in indication that the Berber was prodding against the obstruction that prevented the door from being opened. But the key of Story resisted all attempts to dislodge it, and the American grinned in the darkness.

Abruptly the scraping sounds were replaced by silence. A flash of intuition told Story what was about to happen. A quick stride carried him away from the door to the side of Annette. "Get over there!" he muttered in her ear. "As far away from the door as you can!"

In the darkness he saw the girl move to the cot at the end of the room. He stepped in the opposite direction, placing his back against the wall at the side of the door. Neither Immedin nor the guard knew that he was in the cell with Annette.

Hardly had Story gained his position when the sound of a pistol-shot echoed throughout the prison. The bullet thumped into the door, crashed through the wood and metal about the lock. The offending key flew from its shattered slot, falling to the floor with pieces of splintering wood. More shots followed and the iron lock rocking under the impact under the blows of the concentrated fire, and with the final shot, became a shattered ruin.

The door creaked and moved inward under an unseen hand. The light of the lamp in the hall threw a yellow square on the floor of the cell and brought into relief the figure of Annette huddled on the cot against the wall. Her swinging door was paused almost at right angles with the wall, cutting off any view of Jack Story, who was behind it.

"There is the girl, O Sheli," said Immedin. "Drag her out."

A shadow fell on the rectangle of light on the floor. As the guard stepped into the cell, the crunch of his boots on the floor was a cover for the soft footfalls of Story advancing step by step with him in the dark shadows on the other side of the door.

Story halted when he had reached the end of the door. The shoulder of the guard almost brushed against him. As the Algerian started past him, Story thrust out his foot and hooked his ankle about that of the unsuspecting man.

The guard tripped and sprawled, landing heavily on the floor before the cot of Annette Fournier. Before the fellow could make a move to rise, the girl had dived from the pallet to the floor, landing like a springing tigress on the head and neck of the Spahi.

"By Allah! the came the exasperated snarl of Immedin as he came clumsily as thou art witless! Get up, you out, and bring out that girl!"

But for the moment, that was an order impossible for the hapless Spahi to obey. Had Annette landed on his shoulders or his back he could have shaken her off. But the weight of the girl was on the man's head and neck, pinning him to the floor, and any effort to dislodge her placed the soldier in danger of breaking his own neck.

The lighted area of the floor shifted shape, indicating that Immedin was lowering the lamp hastily to the floor of the hall. Then the elongated shadow of the tall shik swept into the cell as the Berber hurried to the assistance of the man who was thrashing on the floor like a decapitated fowl.

Jack Story gathered himself, and

at just the right instant, stepped from the shadow of the door squarely in the path of the angry Arab. The American moved so swiftly that Immedin, his attention engaged by the struggling pair at the foot of the cot, was caught completely unaware. The fist of Story caught the shik in the mid-stance, landing precisely on the point of the man's chin, and Immedin, who was relaxed her hold when before he started to fall.

STORY did not see the Kahiri hit the floor, for he was hurrying to the assistance of Annette who, without prompting, had played the part assigned to her in this drama of desperation. But the French girl required no help.

Like all intelligence agents, Annette Fournier was trained in jujitsu and well able to take care of herself even in a hand-to-hand struggle with a powerful adversary. However, she relaxed her hold when Story reached her side.

"Are you all right, Annette?" he inquired.

"Just a little bit out of breath, Monsieur Jacques," she smiled, brushing back her dishevelled hair.

"Good," Story said. He bent down quickly over Immedin and started removing the headress and cloak from the body of the unconscious Berber. Standing up he draped the cloak about his own shoulders, then placed turban, haik and agal on his head.

"Now do I look," he asked, his usually pleasant-toned voice as harsh and cold as was that of the man whose garments he had donned. "Think I can pass for the Sheli el Kahiri long enough to fool his companions who will be waiting for us outside?"

The girl smiled, her face brightening as realization of his plan of action dawned on her. "You sound like Immedin," she said. "You sound like he and are almost the same height. Wearing his clothes should help, but they should see your face, Jacques."

"I think I can manage," he grinned. "I'll be too dark in the streets for them to see my features clearly."

They would have to move slowly and deliberately now that heading flight was denied them, and they could not leave Immedin and the shik in the hands of the guard. The alarm before they were clear of the building if not An Safa itself. So Jack along too well. "I think the shik and hold over for a couple of months," the banker finally told him.

"I can give you a policy that won't pay anything to your wife in the event of your death within the next two months," the agent said. "How would you like that?"

"I wouldn't buy a policy like that," the banker said.

"Well, that's the kind you get if you don't apply now."

We understand that the banker bought.

"Eat Right To Feel Right" Is Theme In Nutrition Services "Food Revue"

The front line in the chorus of the 1943 edition of the Food Revue is filled by the foods that play the stellar roles in this production whose theme song is "Eat Right to Feel Right." Milk, fruits, vegetables, meat and whole grain cereals are the front-line, while sweets and butter along with other fats provide energy in the back row.

ANNETTE, too, came to a pause beside him. It was explained, at last why the soldiers of Capt. Lebeau were not investigating the shooting in another part of the building. Lined up against the wall of the office were the Berbers of Immedin, every man of whom had a weapon of some sort in his hand.

"You cannot go through there, Jacques," whispered Annette. "The light will fall on your face as soon as you step in the room and they will know you for a masquerader."

Story rubbed his chin, then his face cleared. "If I should carry you through that room," he suggested. "If you would pretend to be unconscious and drop your head on my chest, the hood of your barracan might prevent them from obtaining a clear view of my features."

For answer Annette turned to face him, stepping closer like a child waiting to be lifted by a parent. Story gathered the small figure in his arms and the dark hood of the girl brushed against his face as she nestled her head under his chin.

"Let your arms hang loose and keep your eyes closed," he murmured in her ear, then strode toward the room filled with light and with men.

There was a stir of bodies and a babel of voices as Story entered the crowded office and instantly he was surrounded by a mill of robed figures. But Story refused to allow the press to slow his progress toward the door.

"Outside, O Kahiri," he commanded, without breaking his stride, his rasping voice muffled by the folds of the coat against his nose and lips. "Our work is done."

Their own clamor prevented the Berbers from detecting any foreign quality in the voice of their supposed leader. They trooped after Story as the American marched out of the office, through the remaining hall, and then out into the night-dimmed street.

ONE lone Kahiri was in the street guarding the camels of the Berbers. The Kahiri, anxious for news, surged ahead and groped themselves about a certain kneeling dromedary and thus unwittingly informed Story that was the mount of Sheli Immedin.

"The foreigner tried to run away," Story growled. "He is dead—which explains the shooting you heard."

Still holding Annette, he swung himself into the saddle of the camel and found the stirrups with his toes. The dromedaries bunched together, moving down the street.

He drew his camel to a halt. "No!" he rasped. "We do not go that way!"

Surprised faces turned toward the supposed Immedin as the Berbers pulled their camels up short. A voice said, "But this is the way you yourself had decided that we were to go this way!"

Story cursed under his breath. "Yes, I know, he tried to stop me," he said. "But you, my men, seem to have forgotten the silver of the foreigners. Must we leave that wealth behind? Go, some of you, to the caravaniser, and secure the silver in the saddle bags of the dead outlander. I shall meet you outside the wall."

The last uncompleted sentence fell upon unhearing ears. At the mention of lost every Berber, anxious to get his hands on his share of the worthless silver, jerked his dromedary around and bolted back toward the inn, leaving Story and Annette alone in the dust-filled street.

(To Be Continued)

GOOD SALES TALK

An insurance agent was trying to sell a banker, but wasn't getting along too well. "I think the shik and hold over for a couple of months," the banker finally told him.

"I can give you a policy that won't pay anything to your wife in the event of your death within the next two months," the agent said. "How would you like that?"

"I wouldn't buy a policy like that," the banker said.

"Well, that's the kind you get if you don't apply now."

## SMILE AWHILE

"Are your eggs fresh?" "Madam, the hen doesn't realize I've got them yet."

Wife—The doctor said at once that I needed a stimulant. Then he asked to see my tongue.

Husband (alarmed)—Good heavens! I do hope he didn't give you a stimulant for that, dear.

"Cheer up," said the doctor, "I've had exactly the same complaint myself."

"Yes," replied the patient, doubtfully, "but you didn't have the same doctor!"

Neighbor (sympathetically)—And I know how long these years must seem to you.

Deserted Wife—Yes, but I remember when he left just as it had been yesterday—how he stood at the door holding it open until six o'clock in the house.

"Oh, yes, they are a distinctly literary family," said one neighbor to another. "The daughter writes poetry nobody will print, the son writes plays nobody will act, and the mother writes novels nobody will read."

"And what does the father write?" "Oh, he writes checks that nobody will cash."

Mandy—Dey says dat young nigh Kahiri Emdon Johnsd got a terrible position in de army.

Liza—Is dat so? What sort uv a position is it?

Mandy—Why, dey say, he's done attached to a flyin' corpse.

The Boss—Say, young lady, you're 20 minutes late again. Don't you know what time we start to work in this store?

New Employee—Why, no, sir. They're always at it when I get here.

Mrs. White—Mrs. Gray's husband didn't leave her much when he died, did he?

Mrs. Black—"No, but he left her often while he was alive."

Mrs. Scott, reading the evening newspaper: "It says, 'Stock up on coal now!'"

Bill: "That's a fine thing to tell us with our coal bin full of sugar."

The teacher inquired whether the pupils had any favorite song they would like to sing.

"The National Anthem," suggested one.

"What made you think of the National Anthem?" "Because," replied the boy, "then it's time to go home."

## ALL-BRAIN TAUGHT ME SOMETHING ABOUT CONSTIPATION

Have you, too, learned what ALL-BRAIN can do to relieve the cause of constipation due to the lack of the right amount of "bulk" in the diet? It's a "better way" than forcing yourself to take harsh purgatives that offer only temporary relief. Just try eating delicious KELLON'S ALL-BRAIN every morning. That's the simple means that thousands use to keep regular... NATURALLY! Enjoy it as a cereal or in tasty muffins... drink plenty of water... and see what it does for you! Buy ALL-BRAIN at your grocer's, sold in two convenient sizes; in individual serving packages at restaurants. Made by Kellon's in London, Canada.

## An Excellent Food Need Export Permit

For Balancing Food Shortages There, And Many Fish Shortages There. Balancing food shortages in many lines, several varieties of fish are obtainable in most sections of Canada.

An excellent food in itself, fish lends itself to combination with many other foods, and can be served in dozens of different ways, hot and cold.

A recipe book, "100 Tempting Fish Recipes," telling clever and attractive ways to serve the different kinds of fish from Canadian coastal and inland waters, will be forwarded on request by the Department of Fisheries, Ottawa.

War has done what age could not do in the case of E. J. Adams, of Grouseford, England. Adams, now 85, has given up golf. He had pursued the game by taxi, using a cab to drive around the course. The judge ruled such a "waste" of gasoline illegal, and fined the cab driver.

## GOLFIED BY TAXI

War has done what age could not do in the case of E. J. Adams, of Grouseford, England. Adams, now 85, has given up golf. He had pursued the game by taxi, using a cab to drive around the course. The judge ruled such a "waste" of gasoline illegal, and fined the cab driver.

## DID YOU KNOW THAT:

And how his mouth waters as she speaks of those "crisp, golden muffins" she's planning for Sunday breakfast. (Can YOU make commonplace things vivid and amusing?) Because she keeps her eyes open, picks up fresh colorful words and phrases from newspapers and magazines. Dorothy never resorts to worn-out clichees like "You're telling me!" (How's YOUR repartee?) And she's correct. You don't catch her saying "between you and I" for "between you and me," "hadn't ought" for "ought not," (What's YOUR score on errors in English?) Chatting with old friends, meeting new ones, or talking to the boss, you need a good vocabulary—and our 32-page booklet tells you how to build it. Lists errors you're likely to make and gives correct forms. Explains meanings of words often misused, tells what slang isn't acceptable. Send \$15 in coins for your copy of "How I Learned Vocabulary" to Home Service Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg, Man. Be sure to write plainly your name, address, and the name of booklet.

—Plates courtesy Monetary Times, Toronto.

A train crossing Canada in winter travels on nearly two miles of air. Contraction of steel rails in cold weather creates space between each rail. This is one of the odd facts described in an Associated Screen "Did You Know That?" movie short.

Scratching Before You Wash

For quick relief from itching of neck, shoulders, elbows, arms, chest, back, legs, feet, etc., use this... (text continues)

Canadians are being asked to use less butter. A reduction of one ounce a week is the amount of the savings asked for. This means that individual consumption must be reduced by a little less than a teaspoonful a day. Not a very large amount, certainly, and the saving will impose no hardship on anyone.

It must be remembered, says Nutrition Services, that butter is a source of some of the daily requirement of Vitamin A, as well as a source of energy. "The principal sources of this vitamin are the leafy green and yellow vegetables, so be sure to include more of these in menus when limiting the family's supply of butter."

## MORALE AND MANPOWER

Manpower, materials and morale are the three M's of the war production—and the last is not least. Among laymen there is sometimes scepticism as to the practical results of morale-building efforts in the industrial field, but one programme of morale-building tested over the last two years on the assembly lines of the Lockheed aircraft factory at Los Angeles, gives an idea of what can be done.

This is the programme of "You Can Defend America," American counterpart of the Victory Rave, "Pull Together Canada," developed first of all in the Lockheed plant by two young workers who decided that they must be in the union not for what they could get out of it, but for what they could give it. "The American Aero-naut," official union paper of the fifty thousand workers of the Lodge 727 of the International Association of Machinists, carried recently a story headlined: "Members of Lodge 727 Set Pattern for Teamwork and Top Warplane Production—You Can Defend America" Helps Union in its Work of Reaching Workers to Reach Top Production.

One instance quoted is the case of a worker in one section who got sore because another fellow was chosen lead man instead of himself. He started a slow-down that cut production fifty per cent.

"The company's against me," he said, "but I'm showing them where their production was coming from!"

"Who are you showing?" asked the shop chairman. "You're showing your wife and mine and all the other families that depend on our planes to win the war. You're showing MacArthur and every other soldier whose life depends on these planes. My God, if you'd only put the energy you waste fighting management into breaking bottlenecks on the production line, we'd get somewhere."

Twenty-four hours later, the worker, with a twinkle in his eye, reported production back to normal. Two days later it was up twenty-five per cent. Soon he was lead man in another section, and calling his gang together he asked for their co-operation. "I want to learn from you," he said. He got a new kind of teamwork from that bunch, and production jumped 20, 30 50 and even 60 per cent.

Morale thus built to last, is a commodity we shall need to carry over after the war into the tasks of peace.

## ACCOMPLISHMENT

A substantial accomplishment of the Alberta government, The Hanna Herald points out, is the keeping down (and even reducing) of the provincial debt. True, this situation was forced on the government, because the financial policies it pursued destroyed its credit and prevented further borrowings. Which arouses the thought that it might have been better for Alberta if its credit had been destroyed twenty years ago. Our debt then was around \$40 million and we could have whittled it down considerably in the interim.—Brooks Bulletin.

Jasper's Aid to Russia subscriptions totalled \$289.55, Dr. T. O'Hagan, formerly of the Crow's Nest Pass, was one of the leading subscribers.

## MORE LEBENSRAUM

Premier Aberhart wants to enlarge Alberta's boundaries. He says that the great territory lying north of the province should be handed over to the Alberta government. Apparently he thinks we need more lebensraum.

At the present time Alberta has an abundance of land and natural resources without seeking more. The one thing that remains to be done is to develop what we already have. In this great province, with its 250,000 square miles, we have less than a million people. If there were more intensive development, the province could support five times that number. It is true that in the territory to the north great undeveloped wealth exists. However, in order to develop it, capital is required, and the Social Credit government's line of conduct has been such that there is no incentive for capital to come here. That situation has worked adversely against Alberta during the past seven years, and will continue to do so just as long as this government is in power.

If the provincial government did induce the federal authorities to advance Alberta's boundaries to the north it might readily mean a substantial increase in taxation on the limited population. Where would Mr. Aberhart get the money to develop that area? He cannot borrow it, and would have to raise it through taxation. So it seems just as well that the Dominion government refuse to agree with Alberta's "drang nach nord" campaign.—Hanna Herald.

The annual meeting of Bellevue taxpayers was held in the I.O.O.F. hall on Thursday evening last. The principal business, after reports were read, was election of three trustees, who were returned by acclamation.

Winter wheat was sown in Northern Ireland under excellent weather conditions and acreage sown is greatly increased over last year. Australian wheat production 1942-43 may exceed 150,000,000 bushels. British farmers will sow an additional 600,000 acres of wheat in 1943.

## LIQUOR ADVERTISING

The Brooks Bulletin is not greatly concerned from its own standpoint, over the federal government's action in eliminating liquor advertisements in newspapers and periodicals. The only liquor firm advertisements we ever carried were from Alberta breweries and these did not always advertise to encourage the consumption of beer, rather they advertised in aid of the war effort.

We do think, however, that those newspapers and magazines which obtained a considerable revenue from liquor advertisements have been unfairly treated. These days publishers have a tough time keeping going, what with goods being scarce and many avenues of income cut off. What the liquor companies spent with newspapers and magazines did little harm to the people and helped keep a tune going on the cash register.—Brooks Bulletin.

If your wife laughs at your jokes, it means that you either have a good joke or a good wife.

## "LET US LOVE"

Let us love—God's children we, United in arms do we stand free To our country's aid.

Let us love our men in khaki. Here, there or wherever they be—Our men so brave.

Let us love those in air force blue, Noble men, courageous, bold, true. Lord, keep them safe.

Let us love the sailor in the white, Whose tender heart yields unimagined might On the ocean wide.

Let us love, on Canada's broad soil, With strength and power we shall toil To win the fight.

Let us love when work is done, When the bloody battle has been won And freedom exists.

Love will rule the world the next tomorrow, Banished will be the hate and sorrow Of men today.

Anna P. Salus, Coleman.

Five persons were killed, 150 injured and a number are missing as a result of a dynamite explosion and fire near Dawson city the early part of the week. Damage was estimated at around \$350,000.

Calgary's liquor store supplies ran out early on Saturday afternoon with hundreds of would-be customers turned away disappointed and dry. It was said that liquor was being bootlegged at as high as \$15 a bottle of 40 ounces.

W. Kerr, of Bellevue, and Stan Walker, of Finch Creek, took in the big bonspiel at Lethbridge this week.

A large sign has been placed at the base of the Frank slide, worded: "Turtle Mountain Ski Way."

Mr. and Mrs. Cliff Church, of Macleod, last week received word of the safe arrival in England of their son, Lieut. Jack Church. Mrs. Jack Church is visiting friends in the Cranbrook district.

## SUNDAY SPEAKER

A practical demonstration of his faith in Canada and its people is L'Abbe Arthur Maheux's current broadcast series, "What Keeps Us Apart?" in which this gifted and warm-hearted Canadian is endeavoring to bring English-speaking Canadians and their brothers of French origin closer together in life and thought. L'Abbe Maheux is heard over the C.B.C. national network on Sundays at 10.15 a.m. M.D.T. The broadcast is carried on Station CBK, Watrous, and other western stations.

The Canadian Aid to Russia Fund now stands around the \$2,000,000, and money is still coming in.

The House of Commons at Ottawa has passed a bill providing a supplementary war appropriation of \$858,000,000.

Observer Douglas Bevan, son of Rev. and Mrs. H. J. Bevan, of Cayley, formerly of Coleman, is reported missing after air operations overseas. He was in his 28th year.

Mrs. Grace Downey, of Blainmore, patient in St. Vincent's hospital at Pincher Creek, is reported doing nicely following a major operation. Mrs. Downey is daughter of Mr. and Mrs. James F. Lote.

Word has been received in Coleman of the death of a former Coleman business man, Athelbert Webster, in a Vancouver hospital on Sunday. Mr. Webster was born in Dresden, Ontario, and came west early in the century. Before coming to Coleman, he was in business at Bassano and Pincher Creek.

A Dutch woman was arrested for listening to B.B.C. broadcasts from London and mailed before a Nazi court. "Why did you do this?" asked the judge. "Oh, but your honor," she replied, "Hitler told us he would be in London in October, 1940. I have been listening every day since then. I would not want to miss Der Fuehrer."

The Air Cadets will attend church parade on Sunday. Catholic personnel will attend St. Anne's church, while Protestant personnel attends United church at 11 a.m., to which the public are invited. The United church service for this church parade does not take the place of the regular Sunday service, which will be held in the evening as usual.

Tom Uphill, Labor M.P. for Fernie, told the British Columbia legislature that "fanatics on prohibition are putting the country on the hog. Twenty years ago a bunch of fanatics advocated prohibition and got it. Today that same bunch of fanatics are hobnobbing with Prime Minister Mackenzie King, working towards the same end. They are putting the country on the hog." He thought the government should protect the working man instead of penalizing him.

The remains of Mrs. A. F. Sherring, who passed away at Frank on Wednesday last week, were laid to rest in the Hillcrest cemetery on Saturday afternoon, following services conducted by Rev. John Wood, of Staveley, formerly of Hillcrest. Mrs. Sherring was in her 57th year. A native of Belfast, Ireland, she had resided in Frank for many years. She is survived by her husband, one daughter, Mrs. T. Ferretti, and a son, William, who is with the active forces overseas. Also surviving are a brother in Montreal and a niece in Kingston.

## UNIQUE ORGANIZATION IS FORMED IN CALGARY

Under the chairmanship of Mr. W. H. Ross, Calgary manager of national selective service, and with armed services officers in attendance, a rather unique school of instruction opened its first session Tuesday morning in Calgary. As explained by Mr. Ross, the conference of representatives of the national selective service had been called so that they might learn the requirements of the armed services, particularly in relation to women. Seeing for yourself was better than just being told and army, navy and air force officers would give all the information they could and would also conduct the group on tours of their respective barracks. It is planned that the armed services will be able to act as prospective employers and will receive the same co-operation as an employer from the national selective service. It works both ways—girls desiring employment will be told of the trades open to them on active service, and no preference will be shown urging them into one branch of the service rather than another.

There are many privileges which women gain upon enlistment, besides serving their country. Girls may enlist as general duties and shift into special work when they learn what opportunities they may use. Educational opportunities are numerous, and as her education became more complete—benefiting the girl—she in turn benefits the unit in which she works, as having a higher standard. Dental and medical care must be considered, and physical training and drill frequently after appearances considerably for the better. Recreational facilities are numerous on almost any station—the girls hardly need to leave it to find varieties of sports, movies, dancing, concerts, etc. Home life is missing, of course, but sometimes that is an advantage—there are not the usual small home worries. The uniform permits girls of all classes and creeds to meet and mingle on the same footing. Their common qualification was the desire to serve.

The last hour of the morning session was devoted to questions, when the delegates had the opportunity to clarify any points on which they desired additional information.

At the organization meeting, Miss Aileen Picard represented Blainmore.

## SOME SCOTCH MATHEMATICS

An Irishman working for a Scotchman asked for an increase in pay. The Scotchman replied: "If you are worth it, I would be pleased to give it to you. Now, let me see what you do in a year. You have 365 days in a year. You sleep 8 hours every day, which makes 122 days you sleep, taken from the 365 days leaves 243 days. Now, you have 8 hours recreation each day, which makes 122 days taken from the 243 days, leaving 121 days. We have 52 Sundays in a year which you leave off, leaving you 69 days. You have 14 days vacation—take this off and you have 55 days left. You don't work Saturday afternoons; this makes 26 days in a year. Take this off and you have 29 days left. Now, Pat, you allow one and a half hours per day for meals, which totals 28 days in a year. Take this off and you have one day left. I always give you St. Patrick's day off, so I ask you, Pat, are you entitled to a raise?" Pat answered: "Well, be jabsers; what have I been doing then?"

Three young pupils were dismissed from a Lethbridge school for refusing to salute the flag.

A prairie missionary expressed himself as highly pleased over his visit to this district last week. While in the Pass he availed of the opportunity of doing some skiing, and borrowed an equipment with which he claimed to have climbed Turtle in about an hour, descending in less than four minutes. That descent voyage must have been a dangerous one, what with trees, stumps and caves every few yards. He's apparently the first skier to have ever tackled Turtle.

## 29 SECONDS TO GO IN STUDIO "B"

It's 6:14:40 in C.B.C.'s Vancouver studio and Producer Helen Argue is about to raise her finger to give the cue that will open the programme by Leon Pommeres. Pommeres is a Polish pianist whose musical life began in Warsaw. He has been in Canada less than a year and already has an enthusiastic following with his coast-to-coast daily piano recitals. Helen Argue, native of Saskatoon, came to the

Private Oliver Barringham, who is stationed in eastern Canada, was a visitor to Coleman last week.

The Fernie Free Press blames Ed Duthie for saying that a chiropractor is a fellow who gets paid for what an ordinary fellow gets stapped for.

Mrs. Ernestina Brehm Breckenridge, aged 68, resident of the Pincher Creek district for the past 37 years, passed away in a Calgary hospital on Sunday last, after a lengthy illness. She was a native of Hespeler, Ontario. Her husband, the late Wm. J. Breckenridge, predeceased her six years ago. She is survived by two daughters, Mrs. S. Pearson and Mrs. H. A. Taggart, both of Pincher Creek.

C.B.C. in Toronto as staff pianist in 1935. For several years she was in charge of artist auditions. Last summer she was appointed one of the few women radio producers in Canada, when she joined the staff of CBF, Vancouver. She is a musician of understanding and ability, and is responsible for a number of west-coast musical organizations.

Coleman Lions propose sponsoring the annual drama festival in April. Mr. Sid Short has been appointed manager and extends a cordial invitation to all clubs in the Pass and Southern Alberta. The Lions' shield, won last year by Coleman Dramatic Society, will again be competed for.

Fernie District Rod and Gun Club has been re-organized for the 1943 season, with H. P. Wilson as hon. president; T. H. Cox, E. K. Stewart and P. Bratten as hon. vice-presidents; William Peters as president; J. Brown as vice-president; S. Serak as secretary-treasurer. During the past year the club donated \$50 to the B. C. Sportsmen's Spitfire Fund, and \$15 to the Fernie branch of the Red Cross.

## MILITARY CALL-UP: SINGLE MEN

Francis J. Lote, local manager, employment and selective service officer, states that Hon. Humphrey Mitchell, minister of labor, has called attention to the fact that the date for the registration of single men under the military call-up has been extended from February 1st to March 1st, 1943. The single men now required to report are those in age classes previously designated for the call-up, but who were not notified to report for medical examination. Men in the Armed Forces are not, of course, required to register.

Single men are described in the regulations as including men "who were on the 15th day of July, 1940, unmarried or widowers without child or children, or have since the said date been divorced or judicially separated or become widowers without child or children."

Word from Ottawa is that this registration will not be extended further after March 1st. If you are too far from the local office or post office, have your foreman get the forms for you and have him sign them and deposit them at your local national selective service office.

In supreme court at Calgary on Monday a divorce decree absolute was granted Geoffrey Leopold Knowles, against his wife, Lymie Knowles, of Coleman. T. J. Costigan, of Blainmore, acted for the plaintiff husband.

Mr. John Baird, Blainmore old-timer and highly respected citizen, moved to Calgary on Thursday of this week, where he has entered a home for the aged. He was accompanied to the city by Idris Evans by car. "Jock" is one of the survivors of the Red rebellion, and is now in the eighties.

The 35,000-ton French battleship Richelieu has arrived safely in New York harbor. She was accompanied across from Dakar, West Africa, by the French cruiser Montcalm, 7,500 tons, and a fleet of American destroyers.

A type of wild goat with large flat, backward-curving horns. It inhabits the highest regions of the Alps and Pyrenees in Europe, also the Abruzzian and Nubian Mountains in Africa.

## NEW

# Gasoline Rationing Plan Goes into Effect

## APRIL FIRST

ON MARCH 31 the present gasoline ration licenses and coupons will expire, and no gasoline will be sold except upon the presentation of a 1943-1944 ration book.

In his own interests, every vehicle owner is asked to apply at once for a new gasoline license and ration coupon book for each of his vehicles.

Under the new system, effective April 1, all commercial vehicles will be rationed. All non-commercial vehicles will be granted a basic "AA" gasoline license and ration coupon book, containing 40 coupons for a passenger car, or 16 for a motorcycle. Owners of non-commercial vehicles eligible for a special category, who can prove their need, will be granted an extra vocational allowance, fixed in advance for the year ending March 31, 1944.

The extra allowance for a special category car will be tailored to meet individual needs. In determining this allowance the previous category and mileage of the car will not be considered. Instead the vocational allowance will be based on two factors: (1) The gravity of the oil shortage with which Canada is faced, and (2) the importance of the vehicle to its owner in a country at war.

The extra vocational coupons will be issued in books labelled "Special", and each such book will contain not more than 60 coupons. Only one "Special" book, or portion of such book, will be issued at a time, and hence the case history of each special category applicant will be under constant review.

Under provisions of the rationing order, the Oil Controller will have the right to refuse any application for a special category, or to suspend any ration book for an infraction of the regulations.

Every motor vehicle, other than a motorcycle, must bear on its windshield a sticker indicating its category. After April 1, service station attendants will not be permitted to serve gasoline to a car which does not bear the sticker which corresponds to the ration book submitted at the time of the purchase.

To obtain a gasoline license and ration coupon book, secure an application form at your nearest Post Office. Study the form and follow the instructions contained therein.

When you receive your ration coupon book, guard it carefully. It may not be replaced if, because of your negligence, it is lost or stolen. Do not leave it in your car; keep it on your person at all times.

### THE DEPARTMENT OF MUNITIONS AND SUPPLY

HONOURABLE C. D. HOWE, Minister

# The Submarine Menace

RECENT VICTORIES on the various fighting fronts, and our growing air offensive have given rise to feelings of increased optimism among the people of the United Nations. In recent months we have, for the first time in this war, seen German armies put to flight and German cities devastated from the air. After the years in which our reverses outnumbered our victories it is with great relief that we see the tide of battle turning surely in our favor. We are warned, however, against any feeling of over-optimism, or against any tendency to exert less than a maximum effort on the home front. We still face powerful enemies and it will take a strong and sustained effort on our part to achieve the victory which now appears to be in sight.

## Sea-War Is Still Serious

There is one phase of the struggle about which we do not hear many details, but which has a great effect on the outcome of the war as a whole. This is the battle between the enemy submarines and the ships of the United Nations. Supplies are vital in maintaining the fighting fronts, and they are carried by sea from Britain, the United States and Canada to Russia, North Africa and the other war zones. Submarines are seriously menacing all our sea lanes and they still a very real threat to an early Allied victory. Germany has recently developed heavy sea-going submarines of 1,000 tons and more, capable of a surface speed of 18½ knots. The Germans claim that these submarines can stay at sea for long periods, and can cover very great distances, because of their size, and because they can renew crews and supplies by contacting large "mother" submarines at sea. Dr. Goebbels boasts that Germany is now placing great hopes in her growing submarine strength.

## Easy Victory Is Not Close

The seriousness of the U-boat menace is fully realized by the governments of the Allied Nations and great efforts are being made to deal successfully with it. It is thought that the convoy system is now less effective than it was during the last war, since modern reconnaissance facilities enable submarines to detect convoys and subject them to constant attack. It has been pointed out that while the loss of ships in these submarine attacks is most serious, sometimes the cargo lost is even more valuable than the ship, and that as long as the Germans continue to harass us in this way, there is uncertainty as to the measure of the support we can give the armies on the widely-scattered fighting fronts. This view of the war is not a cheerful one, and it reminds us that we are not close to an easy victory. There is still need for a maximum effort on our part if victory is to be assured.

## Dried Fruits And Vegetables

In these days when inevitable shortages occur in certain of our basic foods, we should not overlook the possible substitution of dried fruits and vegetables as a means of balancing our daily diet. Most of us tend to forget that they exist, but they have a definite role to play, especially in wartime. Dried fruits include the lowly prune, dried apricots, raisins, figs and dates. Peas, lentils, lima and navy beans comprise the better known dried vegetables.

These dried foods cannot be considered in any sense good sources of the all-important vitamin C. However, they are all generally fairly rich in iron and copper, and the vegetables have a high protein value. Dried apricots, particularly, have a high percentage of copper, which, health authorities assert, is useful in adjusting the human system to the assimilation of the iron which also contains.

Prunes and apricots can be very tastefully prepared in desserts, and figs, dates and raisins can be used in puddings or eaten just as they are. Because of their high protein value lima beans can very well substitute for a meat dish, while lentils and peas are mighty useful. Baked in a casserole and covered with tomato sauce, they are a very tasty dish. Dried peas, of course, can be used instead of the canned variety as one of the vegetables, and they must be soaked in water in order to make them soft enough for use.

Lentils or split peas are an invaluable addition to soups and stews, lending a pliant flavor all their own, that makes one ask for more.

All or most of these dried fruits and vegetables are available in our stores. Whenever you feel stuck about that midday or evening meal, it wouldn't hurt to consider them.

Write to the Western Division Health League of Canada, 111 Avenue Road, Toronto, for your free copy of authoritative Vitamin Chart.

## Recipe Of The Week

The Queen of Hearts is trumps on St. Valentine's Day. So is the hostess who serves Queen of Hearts cake on February 14, especially if it is this sweet as a nut layer, shaped like a heart, frosted in white and decorated with bright red candy hearts.

The recipe was designed to be kind to your ration card. Not nuts but crisp shreds of All-Brain give the batter that sweet, nutty flavor. Strawberry jam not sugar is employed as the sweetening agent. A seven-minute frosting is nice on top if you have an extra cup of sugar handy, but if you haven't, a jam flavored egg white topping will bring just as much applause for the cook. The recipe goes like this:

### QUEEN OF HEARTS CAKE

Soak All-Brain in milk about five minutes. Blend shortening with ¼ cup jam. Add egg yolks; beat well; stir in soaked All-Brain. Sift flour, salt and baking powder; add to creamed mixture alternately with remaining jam. Fold in stiffly beaten egg whites. Pour into deep nine-inch layer cake pan; bake in moderate oven (350 degrees F.) 30 to 35 minutes. Remove cake from pan. Cut large heart from stiff paper. Place heart on top of cake. Cut around heart. Frost cake with meringue made of 1 egg white, 1-1/2 teaspoon salt and 2 tablespoons strawberry jam. Decorate with red candy hearts.

Note: Save part of cake that has been cut away. Serve in dessert dishes with smooth custard sauce.

## Roll your own! go for Ogden's

The covered wagon was distinctive of pioneering days in the West... Ogden's is a distinctive blend of choice, ripe tobacco... Ask an old-timer and he'll tell you that Ogden's isn't just tobacco—it's a famous brand with a famous name. Try it today.

Ogden's quality for pipe smokers, too, in Ogden's Cut Plug.

## More Wool Needed

### The Production Of Wool Is Of The Utmost Importance

To meet the needs of the armed forces of the United Nations, and at the same time supply civilian requirements, the production of wool in the various countries is of the utmost importance. In Canada the 1943 production objective for sheep and lambs calls for an over-all increase of 12 per cent. In the provinces, with the exception of Saskatchewan, are expected to show increases of 10 per cent. or more, states the Current Review of Agricultural Conditions in Canada.

Based on 1,000,000 more sheep, in Canada, the goal for the 1943 wool production would be about 7,000,000 more pounds than in 1941. The Canadian production of shorn wool in 1942 is now estimated at 129 million pounds, or 10.8 per cent. higher than in 1941. The main contributing factor to the larger clip was an increase of 118,000 in the number of sheep shorn.

The world supply of wool is now about to be enormously increased by the seasonal wool clips. The Australian clip now coming into the market will be well in excess of one billion pounds. The New Zealand clip will exceed 300 million pounds. Uruguay and the Argentine will have a combined clip of between 400 and 500 million pounds, including between 250 and 500 million pounds of fine apparel wools. The forthcoming domestic clip in the United States is estimated at approximately 450 million pounds. It is expected therefore that approximately an additional two billion pounds of wool will be available to the United Nations during 1943.

## GENES OF THOUGHT

### SELF-EXAMINATION

Know ye not that we are the temple of God, and that the Spirit of God dwelleth in you?—1 Corinthians 3:16.

Only by knowledge of that which is not Thyself, shall Thyself be learned.—Owen Meredith.

Once read thy own breast right, And thou hast done with fear! Man gets no other light. Search he a thousand years.

—Matthew Arnold

We should examine ourselves and learn what is the affection and purpose of the heart, for in this way only can we learn what we honestly are.—Mary Baker Eddy.

By these things examine thyself.—What faith, humility, self-denial, and love of God and to man have there been in all my actions?—John Mason.

Never let us be discouraged with ourselves. It is not when we are conscious of our faults that we are the most wicked; on the contrary, we are less so.—Fenelon.

## Relieves distress from MONTHLY

## FEMALE WEAKNESS

Lydia E. Pinkham's Vegetable Compound is the only medicine for women's troubles. It builds up the system, restores the natural balance of the body, and cures all kinds of "female" ailments. Made in Canada.

## SWINE DISEASES

### Hemorrhagic Septicemia Is Contagious Baby Pig Disease

This is the first of a series of six articles by J. L. Allen, V.M.D., a clinical veterinarian, Regina, dealing with the more prevalent swine diseases. The remaining articles will appear weekly in the following order: Bangs and Diarrhea; Potentia; Sprue; Worms; Anemia; Lice and Galls.

Hemorrhagic Septicemia is a contagious disease of swine and is responsible for quite heavy losses in the swine herds of this province. It is usually characterized by an inflammation of the lungs or pneumonia and is also known as Swine Plague. Young pigs are particularly susceptible, but animals of any age may be affected. Healthy pigs are quite resistant to this infection but animals with weak constitutions and resistance reduced by exposure, shipping, parasites, or other disease conditions are very susceptible to this disease.

The cause of Hemorrhagic Septicemia is an organism known as the bacillus suis. This organism has been isolated from many sources and is readily destroyed by exposure to sunlight, drying or ordinary disinfectants. This germ is frequently found in the lungs of normal healthy hogs, and appears to cause them no inconvenience. This, however, may be the reason that pigs which have had their resistance reduced from other causes frequently develop the disease. As a rule the infection enters the body by being inhaled with particles of dust, and it therefore more prevalent during dry weather.

Symptoms: The symptoms of this disease are usually divided into acute and chronic forms. In the acute form the animal is rapidly and may prove fatal in a few hours. Temperatures range from 104 to 106 degrees. Lack of appetite, weakness and lassitude are noticed. The skin may take on a reddish or bluish tinge just before death. In the chronic form of Hemorrhagic Septicemia the usual symptoms are those of pneumonia. There is a rapid onset, with heavy breathing; discharges from nose and in some cases, also from eyes. Constipation and diarrhoea, and in some cases, vomiting may be noticed. Affected pigs lie in their lairs and gradually lose flesh. The skin under the throat, the belly and around the ears may turn a red or bluish color. Pigs so affected usually die or show evidence of improvement within a week, or in some cases gradual improvement may be noticed and then they lapse into the chronic form of the disease. The chronic form usually follows an acute attack; animals are weak and gradually lose flesh. The hair coat is rough and shaggy and they either die or remain permanently lame.

Post Mortem: In post mortem held on hogs dying from Hemorrhagic Septicemia large portions of the lungs are found to be dark red colour, solid or liver-like; if a portion of this lung is removed it will sink in water. The lungs are frequently stuck to the chest wall, and small hemorrhages may be found in various parts of the body.

Diagnosis: The diagnosis of this disease is always difficult and should never be positive unless confirmed by a laboratory examination.

Treatment: All affected hogs should be isolated from healthy animals, placed on soft, easily digested food and kept in comfortable surroundings. In the acute form Anti Hemorrhagic Septicemia Serum is injected in the early stages if given in doses of 20 to 30 c.c. per 100 lb. of pig, injected deeply under the skin. This serum is also useful to give immediate protection to hogs which have been exposed to an outbreak of this disease, for this purpose 10 to 20 c.c. injected under the skin is sufficient. Healthy swine may be protected from this disease by injections of Hemorrhagic Septicemia Bacterin. This product, however, does not give any protection for more than seven to ten days after the injection has been given and is of no value in the treatment of sick hogs.

Prevention: Treatment of sucking pigs when six to ten days old with injections of Hemorrhagic Septicemia Bacterin, and repeating these injections daily, the pigs are two and a half months old, is recommended for the prevention of this disease in swine. If this policy were adopted as a general practice by swine breeders this disease could be effectively controlled.

Note: All hog houses, pens, etc., which have been occupied by hogs suffering from this disease should be cleaned and disinfected before being used for healthy swine.

## BABY PIG DISEASE

Pigs from twenty-four to seventy-two hours old show symptoms of shivering, dullness and loss of appetite. They have a tendency to huddle into the straw, and when disturbed emit a weak, crying squeal. The coat becomes rough, the skin cold and clammy and finally the pigs lapse into a coma. Death of one or two pigs in the litter occurs in from twenty-four to forty-eight hours after the first symptoms.

Recent investigations have shown that the blood of affected pigs contains much less blood sugar than that of normal pigs. The cause of this disease is not known, but it seems to occur more frequently in baby pigs which have either been starved or not had sufficient milk during the first twenty-four hours of life.

Treatment: Treatment has not proved very successful except in the very early stages. In cases where sows do not appear to give enough milk to properly nourish the small pigs, hand feeding of pigs with cow's milk spread over a twenty-four hour period and continued for three or four days until the baby pigs are able to drink out of a shallow pan, is recommended.

## AIR TRAINING PLAN

### LIST OF GRADUATES

The following students graduated under the British Commonwealth Air Training Plan from the No. 7 Bombing and Gunnery School, Paulson, Man., (Wireless Air Gunners)—

Set. R. M. Clark, Winnipeg, Man.  
Set. H. W. Genna, Dorchester, Man.  
Set. J. L. Har, Portage la Prairie, Man.

## FOR MEATLESS MEALS

For the benefit of nutrition-conscious housewives, Southern Canada experts have suggested the following substitutes for beef on meatless days: Baked beans, corn, nuthing green vegetables, cabbage salad with nuts, fruit and milk. These are guaranteed to provide the requisite protein, minerals and vitamins.

MR. T. A. PUMPHREY is a war worker. He began to feel that, serious and all it always continued. An untimely liver was the cause—frankly-since made him well. Back up your liver with Pilsner Beer, Canada's Largest Selling Liver Tonic.

## Lesson To Be Learned

### Hitler: Finding Out Brute Force

Hitler swore that Leningrad would fall. When his armies had all but surrounded it, when the city's only means of getting supplies was over waters under German bombers, he had American correspondents' down from Berlin (the United States was not yet at war with Germany) to witness its surrender. The surrender never came. Hitler was to learn that the spirit of man, his inborn love of liberty, is mightier than brute strength, the force of right stronger than the right of force. Immortal Leningrad taught them that; on other fields by other men the lesson will be driven home.—Ottawa Journal.

## GAVE VALUABLE AID

Firmen at an East London station used their spare time to sort 2,000 small metal parts to help out a munitions firm on a rush job and refused to accept payment. They completed the job in a week.

## Britain's Food Supply Presents Dual Problem

London.—Since the war began the ministry of agriculture has faced the dual problem of keeping the country fed and cutting down the number of tons of shipping required to bring food to Britain.

Before the war Britain produced less than 40 per cent. of its own food and imported annually some 7,000,000 to 8,000,000 tons of feeding stuffs for farm animals. In 1943 home production was more than 83 per cent. of consumption and importation of feeding stuffs has dropped proportionately.

When surveying the British agricultural picture it must be remembered that this, a country of small farmers, some 300,000 of them in England and Wales alone. There are few big farms such as are common in Canada.

These thousands of little men had to be mobilized on a wartime basis and their complete co-operation was essential to the success of the government's food growing scheme.

Centrally conceived and directed, the plan has been locally directed by county war agricultural committees composed of land owners, farmers, farm workers and such technical personnel as was available.

Out of them grew district committees and sometimes even parish sub-committees, whose job was to visit farms in their areas, draw up programs for increasing production and see that these were maintained.

When Agriculture Minister R. S. Hudson said in an interview that there was complete control over farmers he meant it.

Committees were entrusted with supervision of the management and production of farming in their counties and were given wide powers of control, ranging from giving direction to the number of cattle which might be kept on agricultural land to taking possession of any land and buildings.

Latest available figures reveal that more than 2,000 inefficient farmers have been turned off their land. There have been no kid-glove measures where the ministry of agriculture is concerned.

Government schemes of assistance, however, have gone hand in hand with control. Major assistance, of course, is the system of fixed prices and an assured market for the principal agricultural products—guaranteed until at least a year after the war ends.

## ALASKAN ESKIMOS

Have Put All Their Money Into War Bonds

Seattle.—The Alaskan Eskimos put to shame the patriot who thinks his duty is done when he invests 10 per cent. of his wages in war bonds.

Maj. M. R. Marston, Alaska defence command officer, suggested that the Eskimos invest 10 per cent. of their income in bonds. An old chief replied, "we put it all in bonds," and asked for \$15,000 worth.

"When I told them we needed a road to a certain point the Eskimos said 'United States—the good' and ignored a threat of starvation to themselves to complete the road with volunteer labor," Major Marston said.

## A VETERAN NURSE

Woman Who Served In Northwest Rebellion Dies In Winnipeg

Winnipeg.—Mrs. Phoebe Howard, 78, only surviving nurse who cared for soldiers on Saskatchewan battlefields during the Northwest Rebellion, died in hospital.

In April, 1885, Mrs. Howard, then Phoebe Parsons, was gassed one of three nurses and left by troop train and demoted for Saskatoon, where, with two other nurses, four "dressers" and two doctors, she helped care for the wounded from the Batoche and Fish Creek Engagements. She returned to Winnipeg by river boat.

## HAVE HAD SUCCESS

British Have Won Many Battles With Nazi Submarines

London.—A. V. Alexander, first lord of the admiralty, told the House of Commons that there had been "periods of the most heartening success" in the fight against Axis submarines.

Because of the difficulty of confirming hits in "all the numerous attacks on enemy U-boats," however, it is not possible to say whether they are being sunk faster than they are being built, he said.

## COST OF LIVING

No Rise In Prices For The Next Three Months

Ottawa.—The Dominion bureau of statistics cost-of-living index dropped from 118.8 to 117.1 during December—largely due to government action in reducing prices of certain staple foods—and as a result, the cost-of-living bonuses paid to Canadian workers will remain unchanged for the three-month period starting Feb. 15.

"The January decrease was due entirely to a drop in the food index from 132.8 to 127.3," the bureau of statistics said. "The two-cent reduction in milk prices was the most important factor in the January decline, but prices were lower also for such staples as coffee and oranges."

The cost-of-living index at the start of the war was 100.8, and the wartime increase in the cost of living in Canada thus has been 16.3 points or 16.3 per cent. Last July the cost of living was 17 per cent. higher than at the start of the war, and it was the July figure on which the last revision of cost-of-living bonus payments was made.

Four of the items mentioned by the bureau of statistics as responsible for the drop in the food index were subject to recent government price-reduction action.

Early in December Finance Minister Halsey announced that "by reduction of duties and taxes, and by outright subsidy" the retail cost of tea would be reduced 10 cents a pound, coffee by four cents a pound, milk by two cents a quart in most places, and oranges to "about the levels of September and October, 1941."

These moves, Mr. Halsey said, were to offset increases in the cost of living due to price rises in spite of price-celling control, with the aim of bringing the cost of living "at least part of the way back to the level of the basic period (Sept. 15-Oct. 11, 1941)."

In accordance with order-in-council P.C. 6219, the bureau of statistics said, the price of cigarettes and tobacco in the January index does not include the tax imposed in the 1943-44 budget under the Special War Revenue Act.

## The Farm Labor Problem Needs More Attention

Ottawa.—Delegates attending the 21st annual meeting of the Canadian Horticultural Council here appealed for a definite statement upon the classification of farmers as essential to the war effort or otherwise, and expressed the opinion that the present deferment regulations are unsatisfactory, since a farmer is obliged to apply periodically for further deferment from military service.

Delegates claimed that if the farming industry were essential farmers should be given military deferment for the duration of the war.

T. H. Robinson, assistant director of national selective service, told the meeting that all farmers were entitled to claim deferment from military service. They were required to provide for deferments before they would be allowed.

"Present regulations," he said, "provide that the board may give an indefinite deferment if they wish. It is left to their discretion. You understand that it is the military authorities who wish to keep an eye on applications for deferment. The military is represented on the board and they have a say as to whether or not a man is essential."

The council passed the following resolution:

"That this council endorse and strongly support representations made by Canadian food producing, processing and distributing organizations to the prime minister and members of his cabinet on Jan. 19, 1943, requesting the appointment of one cabinet minister and a food board definitely charged with the responsibility of obtaining an abundant food supply, and the maintenance of means and facilities for its processing and distribution."

## SYNTHETIC RUBBER

Cannot Be Produced In Large Quantity For Two Years

Montreal.—Canada and U.S. will not be able to produce sufficient synthetic rubber to take care of military and essential civilian needs until 1945, Dr. R. V. V. Nichols, assistant professor of chemistry at McGill University, said.

Until then rubber for these uses must be drawn from the stockpiles and from what can be reclaimed, he said.

## CANADIAN ARMY

British Officer Has High Praise For Force Overseas

Somewhere in England.—Canadian officers and men are the finest material in the world, says Lt.-Col. Cyril Lloyd, British officer who served in the Battle of France, and now is on the Canadian overseas army's headquarters staff.

Col. Lloyd, seconded by the British army to the Canadian army, was awarded the O.B.E. in the recent New Year's honours list in recognition of his services to the Canadian forces.

He says his ambition when the war is over is to go to Canada, which he has never seen. He declares he likes the "Canadian method of work, the atmosphere of getting things done, the direct approach to problems."

Col. Lloyd believes that the Canadian army's staff work is as good as exists in any army because the greatest advantage was taken of the months the army has spent in Britain.

## Sir Alan Brooke

Chief of the British General Staff

The rescue of Brig.-Gen. N. F. Twining, Col. Glen C. Jamison and 13 others after five days adrift on two small life rafts was announced.

## Soldier Twins

—Canadian Army Photo.

It is not trick photography even though one is left-handed and the other right-handed when it comes to stuffing towels in kit-bags. The two men in battle-dress are the Schwandt twins, Privates T. H. and F. J. Schwandt, or vice versa, 22-year-old sons of Mr. and Mrs. W. L. Schwandt of Strasbourg, Sask., who after two years in the Canadian Army at Basic Training Centre in Regina, Sask., have been selected to take officers' training courses. Officers can only tell them apart by observing whether one is right handed or left handed.

## Notable Canadian Women Visit New York

New York city council's Newbold Morris is shown with a bevy of Canadian women he welcomed to the metropolis. The women are, left to right, Mrs. Irene Baird, of the Canadian National Film Board; Mrs. Core Casselman, member of parliament for Edmonton, east Alberta; Mrs. Fredrick Baggis, chairman national committee on the causes and cure of war; Mrs. Edgar Hardy, president National Council of Women of Canada, and Mrs. Colwyn T. Cox, chairman Canadian Women's Committee on International Relations.

## Princesses Buy First Pound Saving Certificates

Princess Elizabeth, left, heir apparent to the British throne, and Princess Margaret Rose are signing their certificates of the new one pound issue after purchasing them, in London, England.

## PLACE DISCUSSED

Churchill And Roosevelt Probably Settled Point Of Invasion

Washington.—Walter Nash, New Zealand minister, said, President Roosevelt and Prime Minister Churchill discussed at Casablanca whether to strike at Germany from the Mediterranean or the whole Atlantic coast or from both of these regions.

He said the time and place for invading Europe could not be published in advance since it would be valuable information for the enemy to know, but that it could be said the Casablanca meeting discussed all possibilities and "which was the best place to strike first."

"It was pretty well settled," Nash added, with further reference to the possible point of invasion.

He described the Atlantic coast as that region from the top of Norway to the bottom of the Bay of Biscay.

## LEAN DAYS AHEAD

Says Some Stores Going To Be Out Of Canned Goods

Vancouver.—Lean days are ahead for civilians, with some stores going to be completely out of canned goods "before the pansies bloom again," V. B. Robinson, foods supply officer of the prices board, predicted at a meeting of the women's regional advisory committee here.

"The day of canned goods for the civilian is practically gone," he said. "Workers in construction and essential industries as well as members of the armed forces must be supplied first. Civilians have no right to demand luxuries or even essentials when workers in war industries need them. In 1943 we will be without a lot of things and it's up to us to make something else do."

## MALTA DEFENCE

915 Enemy Planes Were Destroyed In 1942

Valetta, Malta.—Air Vice-Marshal R. K. Park, air officer commanding in the Mediterranean, said that fighter squadrons and anti-aircraft guns on Malta had destroyed 915 Axis planes in 1942 against a loss of only 195 British planes and 106 pilots.

During 1942, he disclosed, the enemy dropped 12,300 tons of bombs on Malta.

## Air Offensive To Decimate Enemy Planes

London.—Maxim of offensive air fighting is that the enemy must be made to take the air before he can be knocked down and on this basis the R.A.F.'s first raid of 1943 on Berlin may be considered a two-fold success.

In the Berlin raid on Jan. 16, when for the first time newspapermen were taken along on an operational trip of Bomber Command, Berlin was hit—hard. And more German planes than Britain has seen for months were enticed into the air, many of them to be knocked down.

The Berlin raid brought the now-famous "reprisals" raids on London and against Fighter Command and the country's other defenses their best chance to work over the German air force since Dieppe.

At Dieppe, while Canadian assault troops stormed the French beaches and the German gun fires, Allied fighters battled German fighters and, it has been estimated, destroyed anything up to one-third of the front line air strength Germany then possessed.

It is a subject, open to argument, but some commentators have held that the air operations were a greater benefit to the Allies at Dieppe than the army venture.

Since then, presumably because the output of German plane factories has been more sorely needed on other fronts, Marshal Otto Sperrle, Nazi air commander in western Europe, has put only a few planes in the air at any one time.

Some months ago, when there was no sign of an air raid on London, I listened to a high air force authority talk about the air war. He said nobody should expect that the blitz had departed London for keeps, that actually its return was something for which preparations were going on night and day.

He did not mean merely that more and more shelters were being built. He meant the R.A.F. was becoming more and more offensive. He warned that when and if the Germans returned in strength it should not be expected that none would get through. "But," he added, "we shall knock down more and more of them, in ever increasing numbers and that's what we want—a chance to really hit them."

## An Estimate Of German Losses On All Fronts

New York.—The New York Times said in a despatch from London that more than 4,000,000 German soldiers are estimated to have been killed, captured or permanently crippled so far in this war.

The figures were assembled by an intelligence section of a United Nations general staff from insurance statistics smuggled out of Germany and on expert estimates in London, the despatch said.

The still-mounting toll was amassed primarily on the Russian front and the figure is equivalent to two-thirds of the present size of the country's army, it was said.

Total Nazi casualties were put at 8,000,000, but this figure included many lightly wounded or temporarily ill who can be fitted for fighting again.

Using its figures on estimates until June 30, 1942, and then computing German losses at the same rate for the second half of the year, the report suggested the total breakdown to the start of 1943 included absolute losses of 3,755,000, comprising 1,750,000 dead and 2,005,000 incapacitated, or more than 4,000,000 when prisoners and missing are added.

If the figures err, the despatch reported, it is on the side of conservatism.

It was estimated Germany now has under arms about 6,000,000 in the army alone, figured at about 300 divisions, and representing almost 13 per cent. of the country's population.

## LAUNCH TWO SHIPS

A West Coast Canadian Port.—A 16,000-ton freighter, the Fort Wellington, and a trim naval corvette, Prince Rupert, to help guard the sealanes, were launched here within an hour of one another.

Lyle Holland has been re-elected mayor of Cardston.

Even a doctor will tell you the best thing to take when you are run down is the license number.

All over Canada volunteer workers are expected to help distribute the new ration books between February 19 and March 1.

Thomas Hugh McCaffery, father of Dr. H. M. McCaffery, dentist, formerly of Brooks and now of Lethbridge, passed away in Calgary on Tuesday at the ripe age of 86.

Word has been received that Mrs. T. W. Hills, formerly of Blaimore, who sustained a fractured leg in a fall a few weeks ago, has recovered sufficiently to be able to return to her home at Elnora, Alberta.

There will be 900,000 new ration books issued throughout Alberta between Friday, February 19th, and March 1st from over five hundred distributing centres organized by and associated with thirty-eight local ration boards in the province.

Flight Lieutenant Jack Rae, 22, reported missing and believed killed during operations over Malta on January 31st, was born in Stavelly, son of Mr. and Mrs. Archibald W. Rae, now residents of Calgary, where Arch was formerly employed by the Canadian Bank of Commerce.

Broomhall says that Canada during the past six months shipped less wheat but much more flour than was shipped during the same six months last year. U.S. farmers have been buying large quantities of low-grade government wheat for livestock feeding purposes, which the government is offering at a special low price. Central and northern New South Wales reports severe stem-rust attacks.

Mushrooms were gathered in the Coaldale district this week.

Gophers are out on the prairies—a fair sign that spring is here in February.

Steve Siga, of the R.C.A.F., Calgary, visited with friends in Hillcrest last week end, and left for a new post in Edmonton early this week.

The Canadian corvette Louisa has been sunk in the Mediterranean by enemy action, taking 38 lives, 33 of whom were Canadians. Forty-seven of the crew were rescued.

Clareholm has let the contract for the installation of a \$28,580 sewage system, to be completed by August 15. The National Construction Company, of Winnipeg, were the successful tenderers.

Among the twenty-five or more women and girls attending the school of instruction for unemployment and selective service in Calgary is Miss M. Derbyshire, of Blaimore. They are in preparation for the armed services of women move.

Only a small part of the Calgary Buffaloes' hockey team succeeded in reaching Coleman for Saturday night's game with the Pass All-Stars. Others were marooned at points between Calgary and the Pass by the storm. Anyhow, the game was played before a fair sized audience, Coleman winning 8 to 4.

At the recent annual meeting of the Natal-Michel Rod and Gun Club, the 1942 fish competition prizes were awarded. Included in the winners were: Sylvio Gris, largest cutthroat trout, 3½ pounds, first prize; Sylvio Muraro, teacher, second prize for fish 2 pounds 9 ounces; Steve Jacko, first for largest salmon, Joe Jarina, second.

## Local and General Items

The Editor will be glad to receive items for this section, regarding visitors entertained, parties, leaving for holiday or short trips, bridge parties, teas, showers, presentations, anniversaries, etc. Phone items in to 11 or hand them in at The Enterprise office not later than Thursday evenings.

The Pincher to Waterton highway is now open to traffic.

Mrs. F. Wheatley has been elected regent of the I.O.D.E. at Banff.

Some people go to the movies to forget everything except not to talk. The president of a big New York City war plant has been arrested as an enemy alien.

Kimberley's contribution to the Aid to Russia Fund totalled \$2,250 in four days, and promises to rise considerably higher.

After a pastorate of the United church for nearly seventeen years, Rev. R. W. Dalgleish, of Clareholm, has resigned.

The third session of the ninth Alberta Legislature was opened at Edmonton yesterday by His Honor J. C. Bowen, lieutenant-governor.

Flight Sgt. Joseph Mervyn Dutton, son of the well known Mervyn Dutton, of Calgary, is reported missing and presumed dead overseas.

Several large boilers from the old Hillcrest mine plant are being loaded at Frank for shipment. Before loading they are being subjected to tests.

Mrs. Joe Christie, of Bellevue, had the misfortune on Friday last to fall and fracture a leg in two places. Mrs. Christie is president of the Bellevue Branch of the Canadian Red Cross.

A move to close all Alberta schools from August 15 until October 15, so that thousands of students would be available for harvest operations, is being discussed.

The No. 2 ration book to be issued next week will contain an application for canning sugar. They are to be used early to allow the sugar administrator to get a clear picture of the requirements.

Mrs. D. A. Howe returned from Calgary on Wednesday, after spending some time visiting her daughter, Thelma, who is a patient in the Holy Cross hospital. Thelma is now reported getting along nicely.

Max H. Werthof, editor-in-chief of The Gateway, official publication of the Students' Union of Alberta University, 1927-28, and former Edmonton barrister, has been appointed a secretary to the Canadian Legation at Washington.

Jimmy, aged six, youngest of eleven children, was taken to the hospital to see his father who was quite ill. Jimmy was quiet, almost reverent, until time came for him to leave. Then he tiptoed up to the bedside and whispered in his father's ear: "Kin I see the baby now?"

Pleading guilty to a charge of hoarding sugar, a Cambria citizen was fined \$146 and costs by Magistrate Bond at Drumheller. On a second charge, of failing to declare the amount of sugar in his possession and to remit his rationing coupons, he paid \$1 and costs.

Madame Chiang Kai Shek, wife of China's generalissimo, will visit Canada in the latter part of March, it is announced. It is being planned that she address the house of commons, the first distinguished woman ever to speak from the floor of the Canadian parliament. While in Ottawa she will be guest at government house.

WOI F. Bogden, of the Air Cadets of Canada headquarters at Calgary, is visiting Turtle Mountain Squadron this week, while on a tour of instruction. He will remain here and work in conjunction with the local unit's officers up to and including Sunday. WO Bogden will visit the Coleman and Bellevue squadrons on similar missions as soon as he is through here.

About one million pounds of butter per day are being consumed in Canada.

The man who tries his hand at a job and fails should try his head for a change.

A local school boy objects to war, because war makes history and he hates history.

Prime Minister Churchill is confined to his bed with a feverish cold. Maybe got his feet wet flying to Africa.

DON'T MISS THIS WONDERFUL PICTURE

**Mrs. Jennings**  
proudly goes  
to school!

MRS. JENNINGS had been just managing to keep her family going. But things were looking brighter at last. Now with the children able to help with the housework, she had applied for the post of school teacher : : : and had been accepted.

But that meant she needed suitable clothes and clothes cost money.

She took her problem to the manager of her bank. On the strength of her ability and character, he arranged a loan of \$80. And so it was that she was able to take the position and greet her first class proudly. She paid off the loan after six months at a cost in interest of only \$2.40.

This is a true story. Only the name has been altered. It is typical of hundreds of human dramas in which the bank manager has been privileged to play a helping role.

War's requirements have increased immensely the work of banks and bank staffs. At the same time more than one-third of our experienced men have enlisted. Bank early. Pay small bills by cash. It helps.

The CHARTERED BANKS of CANADA

## "The More We Are Together, The Merrier We'll Be"

THUS goes the jolly song of the Good Fellowship Brotherhood. Plain simple folksy words, but much truth is embodied in them. Unless we hang together much community prosperity is lost to Blaimore. Consider the printer; he is doing his part in helping along his home town by buying as much as possible here; yet much of the work he can handle goes outside.

No benefit is derived from giving work to outside firms who come around selling you printing. You pay as much for the work; you have to wait longer for it; you have no chance to examine it until the finished work comes along with the bill; and then there is the expressage to pay over and above the straight price.

Compare this with the service of the local printer. Show him what you want and he'll give you a definite price. You know exactly what the work will cost before it is touched. Then you can make minor changes, etc., before the final printing. Delivery is made promptly, too—and nothing is charged for the service.

All in all, you stand to gain by letting the local man handle your work. And do not forget that his active support is behind you and your business.

**"For your friends are my friends,  
And my friends are your friends,  
The more we are together,  
The merrier we'll be."**
